

AXTON WOOD STRIPPER

rapidly and thoroughly eliminates all film forming materials: paints, varnishes, coatings, roughcasts, sizes, mastics, carpet adhesives, etc.,

1

PREPARATION

- On furniture or old or fragile objects, make a preliminary test on an inconspicuous place.
- It is recommended to wear rubber gloves and goggles.
- Shake well before use.

2

APPLICATION

- Apply with a brush or spatula a thick and even layer of Axton Wood Stripper.
- Leave on for about ten minutes so that the blisters develop and scratch with a spatula without scratching the support. If necessary, scrub with a stiff brush (nylon, quack grass).
- Always operate in the direction of the wood fibers.
- IMPORTANT: some coatings blister under the action of the stripper, others soften.
- In the case of exceptionally resistant or thick coatings, repeat the operation.
- After drying the pickled support, peel with a 100 grit abrasive.
- Apply the new finish of your choice.
